Pramāṇa

a journal of physics

Volume 19, July–December 1982

CONTENTS

Atomic and Molecular Physics

X-ray energy levels: Deviations between experimental and theoretical values ..... *Amar Nath Nigam and Om Prakash Rajput* 59–64

Many-body study of van der Waals interaction involving lithium and rare-gas atoms and its contribution to hyperfine shifts ..... *B K Rao and T P Das* 289–302

K-shell ionisation cross-sections of Cu, Ge, Mo, Ag and Sn by protons of energy 0·3 to 1·8 MeV ..... *D Bhattacharya and S K Mitra* 399–412

Force field calculation for inplane vibrations of ethylene using CNDO/FORCE method .... *A Jothi, G Shanmugam, A Annamalai and Surjit Singh* 413–420

Some theoretical studies on concurrent events in photoelectron spectroscopy ..... *M S Gopinathan and B J Cherayil* 421–429

Atomic diamagnetic susceptibilities from the statistical Thomas-Fermi-Amaldi theory ..... *María C Donnamaría, Eduardo A Castro and Francisco M Fernández* 431–434

Cosmic Physics

Integral energy spectrum of primary cosmic rays at high energies ..... *R Hasan, S C Arora, D Hans and M S Swami* 133–140

Crystallography

The crystal structure of (*L*-proline-*L*-alanine) copper (II) 2·5 H_2O ..... *V Amirthalingam and K V Muralidharan* 51–57

Experimental Techniques and Instrumentation

An AC magnetic susceptibility bridge and cryostat for the temperature range 2–300 K ..... *R Ranganathan and G Rangarajan* 65–72

A microcomputer-controlled vacuum adiabatic calorimeter for the temperature range 4·2–300 K ..... *S Raman, N S N Murty, V Shivkumar Roy, V Vasudeva Rao and G Rangarajan* 151–157

Two million volt terminal tandem accelerator....*M G Betigeri, T P David, S C Hiremath, P K Iyengar, M K Mehta, V S Raju, P Singh and J N Soni* 323–336

Design of an accelerating tube for electrostatic accelerators.....
.....*P Singh, T P David and M G Betigeri* 337–347

Electret microphone for use in photoacoustic spectrometer and photoacoustic spectrum of some rare earth oxide powders.....
.....*V N Rai, L B Tiwari, S N Thakur and D K Rai* 579–592

General Relativity

Linearization stability of coupled gravitational and scalar fields in asymptotically flat space-times.....*R V Saraykar* 31-41

Motion of the charged particles off the equatorial plane of a Kerr black hole in an electromagnetic field..*D K Chakraborty and A R Prasanna* 141–150

Violation of the second law of black-hole physics by tachyons....*K C Das* 357–366

Liquids

Orientational order parameters of nematogenic trans-4-propyl cyclohexyl-4 (trans-4-alkyl cyclohexyl) benzoates.....
Srinivasa, M M M Abdoh, N C Shivaprakash and J Shashidhara Prasad 349–355

Nuclear and Particle Physics

General relations among observables in a large class of neutral-current processes mediated by one, two or three Z bosons.....
.....*C C Hazra and M K Parida* 73–97

Some comments on quark masses and baryon magnetic moments.....
.....*K Babu Joseph and M N Sreedharan Nair* 99–102

Dibaryons as six-quark states.....
.....*K Babu Joseph, M N Sreedharan Nair and V G Sreevalsa* 175–182

Supersymmetric solution of gauge hierarchy problem....*Romesh K Kaul* 183–188

The quadrupole plus pairing interaction model in large configuration space for W, Os and Pt nuclei.....*Ashok Kumar and M R Gunye* 189-202

Neutron-antineutron oscillations and SO(10) grand unification.....
.....*Amitava Raychaudhuri and Probir Roy* 237–248

The (α-d) cluster model of ^{6}Li and muon capture.....
.....*I Ahmad and S K Singh* 249–254

Two-body effects on baryon magnetic moments and radiative decays of mesons.....*R C Verma* 255–260

Forward hadron-hadron scattering at high energy.....*R C Badatya and P K Patnaik* 261–268

$SU_2 \otimes U_1$ gauge model of electroweak interaction with $(V + A)$ strangeness-changing charged current.....*L K Pandit* 303–313

Non-renormalization of the weak vertex in gauge theories with integrally charged quarks.....*G Rajasekaran and M S Sri Ram* 315–321

Weinberg-Salam model and chiral symmetry of mesons.....*M S Sri Ram* 501–512

Strong coupling expansion in the massive Thirring model....*R Banerjee* 513–524

Neutrino backgrounds in the Kolar Gold Field nucleon decay experiment.....*M R Krishnaswamy, M G K Menon, N K Mondal, V S Narasimham, B V Sreekantan, Y Hayashi, N Ito, S Kawakami and S Miyake* 525-554

Mass formulae for Λ-hypernuclei....*Kamales Kar and Jitendra C Parikh* 555–563

Reaction ^{48}Ca (p, n) ^{48}Sc from E_p= 1·885 to 5·1 MeV.....*Gulzar Singh, S Kailas, S Saini, A Chatterjee, M Balakrishnan and M K Mehta* 565–577

Optics

The effect of longitudinal-transverse coupling and medium temperature on Cerenkov radiation.....*D Nageswar Patro* 13–30

Plasma Physics

Nonlinear distribution functions for the Vlasov-Poisson system.....*Saroj K Majumdar* 269–277

Ion source scaling laws.....*R Jones* 279–288

Quantum Mechanics

An analytical algorithm for the evaluation of two-electron integrals in diatomics: A test calculation with an elliptical basis set.....*Dhiman Sinha and Rama Basu* 1–12

When is a hidden variable theory compatible with quantum mechanics?..*M D Srinivas* 159–173

Statistical Physics

Fractional order phase transition in lipid bilayer: dipalmitoyllecithin....
....*R C Agnihotri, C Mehrotra, V D Gupta and Vandana Srivastava* 43–49

Solid State Physics

Magnetic domain behaviour of $MgFe_2O_4$–$CoFe_2O_4$ system.....
.....*Venkatesh Rao and H V Keer* 103–106

Electronic structure of disordered BCC alloys.....
.....*V K Srivastava and A Mookerjee* 107–115

Dielectric behaviour of anisotropic ionic crystals.....
.....*M R Srinivasan and P S Narayanan* 117–124

AC conductivity and dielectric properties of sulphate glasses.....
.....*H G K Sundar and K J Rao* 125–131

Temperature variation of the Debye-Waller factors of Ba^{++} and F^- ions in BaF_2 powder by x-ray diffraction.....
.....*R Srinivasan and K S Girirajan* 203–213

Mechanical properties of semicrystalline polymer–polypropylene.....
.....*P K Biswas S Sengupta and A N Basu* 215–224

Volume variation of nuclear Grüneisen parameter for equation of state studies.....*B K Godwal* 225–229

On the theory of electron tunnelling.....
.....*D K Roy, S N T Sai and K N Rai* 231–236

Simple variational approach to the thermal properties of ionic crystals
.....*Rajaram Nityananda and Ramesh Narayan* 367–379

Lattice thermal expansion of silver indium disulphide.....
.....*P Kistaiah, K Satyanarayana Murthy and K V Krishna Rao* 381–384

Luminescence in ZnS:La and ZnS:(Mn, La) phosphors.....
.....*L N Tripathi, C P Mishra and B R Chaubey* 385–398

Lattice dynamical study of body-centred tetragonal indium.....
.....*V Ramamurthy and S B Rajendraprasad* 435–448

Optical absorption spectrum of Cr^{3+} in natural ruby.....
.....*B J Reddy and L Rama Moorthy* 449–454

Mechanoluminescence and high pressure photoluminescence of (Zn, Cd) S phosphors.....*B P Chandra* 455–466

Coherent potential approximation for a disordered diatomic linear chain having diagonal and off-diagonal randomness.....*P Nayak and S N Behera* 467–482

Effect of electromagnetic perturbation on charge imbalance in a superconductor: A two-fluid description.....*B A Mattoo and Y Singh* 483–496

Neutron, x-ray and lattice dynamical studies of paraelectric Sb_2S_3.....*K R Rao, S L Chaplot, V M Padmanabhan and P R Vijayaraghavan* 593–632

A stochastic theory for clustering of quenched-in vacancies-V. Temperature dependence of cluster density.....*G Ananthakrishna* 633–643

Effect of non-magnetic impurities on the observation of superconducting gap excitations by Raman scattering.....*G C Mahanty and S N Behera* 645–663

Spectroscopy

Intensity distribution in the $A^2\Pi - X^2\Sigma^+$ system of yttrium monoxide.....*S P Bagare and N Sreedhara Murthy* 497–499
